

Statement of Luxury Rudra Designs

Generation Next Glass, Railing & Façade Solutions.
Crafted for connoisseurs of design and innovation.

Redefining architecture with glass that thinks, slides, folds, and flies.

Minimalism, Maximized With Sophistication.

Our Philosophy

Design is a language. we speak fluent glass

Since 2003, Rudra Designs has been translating the visions of India's finest architects and interior designers into elegant glass artistry — one bespoke creation at a time.

With a portfolio that spans Mumbai and the country, our work elevates luxury residences, architectural landmarks, and statement interiors with seamless sophistication.

Specializing in high-end decorative glass — fused, engraved, bent, and exquisitely customised — we don't merely supply glass;

We craft tactile stories told through shimmer, texture, and form.

At Rudra Designs, every space becomes a canvas, and every creation — a conversation between light and design.

Our systems don't just sit in silence — they move with purpose.

In the way a balcony vanishes into the skyline.
In the way a skylight opens like a breath.
In the way a façade responds to a single gesture.

It's not about being seen.
It's about being felt.

This is architectural minimalism, not just as design, but as emotion.

Trusted by architects. Chosen by visionaries. Designed for timeless elegance.

Ghost Railings

The World's Smartest Glass Railing System

Minimal. Magical. Motion-Activated.

A railing system that doubles as a motorised sliding glass window, allowing complete height control at the push of a button.

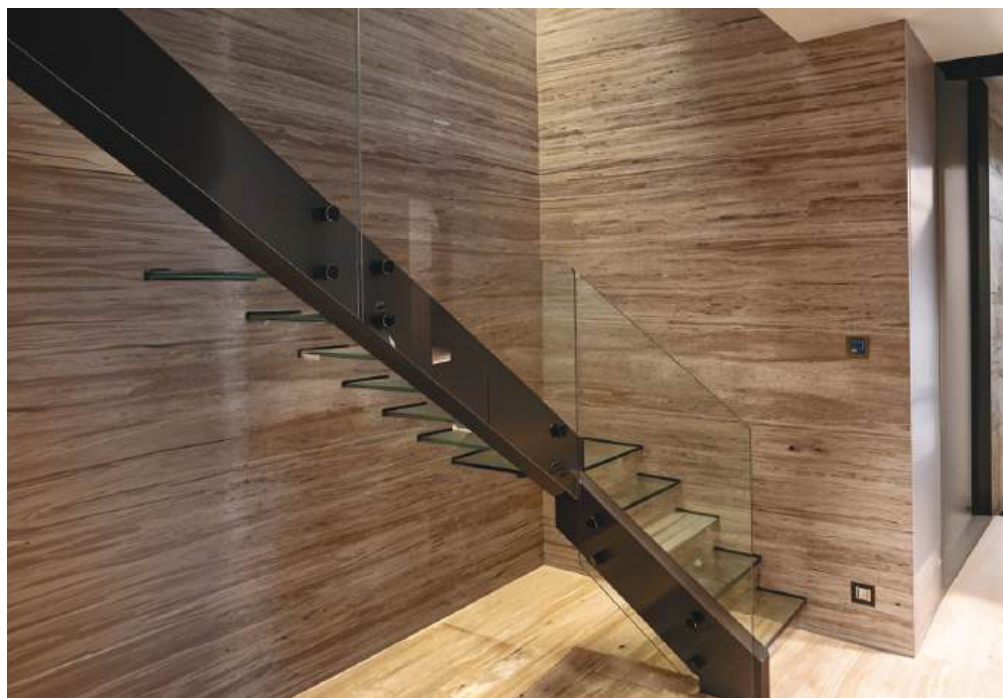

Dual Function: Railing + Ventilation

Configurations: 1+1 | 1+2 | 1+3

Works with tempered, laminated & thermal glass

Perfect for homes, hotels, and high-rises

Invisible strength. Undeniable elegance.

Smart Roofing & Blinds

Moving Sky

Motorised Roof Systems That Breathe With You

Let the sky in or block it out — on your command.

Remote-controlled architectural roofing that shields you from the elements while elevating your outdoor style.

Wind resistance up to 115 km/h

Custom shapes: flat, curved, pitched

Dynamic aluminum finishes + UV-proof fabric choices

Colourful Protection

All-Season Motorised Blinds

A dance of privacy and sunlight.
Modern roller blinds that resist sagging and storms alike.

- Sizes up to 7m wide x 5m drop
- Windproof up to 130 km/h
- Blocks 86% light
- Available in sophisticated shades

Transformative Spaces

Foldable Walls

Your Room. Your Rules.

Create multi-functional, seasonal spaces with sleek glass walls that fold and glide with ease.

Ideal for restaurants, balconies, and showrooms

Smooth glide track system

Safety-first: child & pet friendly

Smart Balcony

Frameless. Flawless. Future-Ready.

An architectural revolution that turns balconies into *usable, weather-proof zones*.

- Noise Reduction: Up to **50%**
- Elegant, frameless design
- Not permanent – yet premium

Live the view. Frame the skyline.

Intelligent Glass Systems

Sliding Systems

Borderless Beauty. Effortless Flow.

Minimalist sliding glass doors and partitions that bring the outdoors in — without letting the weather in.

Easy-to-operate, low-friction tracks

Premium anodised / wood-finish aluminum

Complete gasket sealing

SYSTEM WINDOWS vs. REGULAR WINDOWS

Two Forms. Two Philosophies. One Clear Winner.

System windows are not just built — they're engineered. Fabricated using CNC machines with millimetre-level precision (Computer Numerical Control machines, that deliver flawless alignment and millimetre-perfect finish), they offer flawless alignment, seamless movement, and enduring strength. Each component is performance-tested and backed by long-term warranties, ensuring form meets function for years to come.

Regular windows, often assembled using hand tools and mixed hardware, serve well in cost-effective projects, but fall short in consistency, certifications, and wind load resilience. While popular for low-rise buildings, their performance varies with each fabricator. Windows shaped from Domal-based extrusions may resemble system windows, but lack the CNC precision, certified performance, and structural integrity that define the real thing.

What sets system windows apart

Beyond the Frame. Above the Standard.

Feature	System windows	Regular windows
Fabrication Method	CNC-machined for precision and consistency	Assembled manually with local tools
Design Integration	Seamless, slim-profiled, minimalistic	Bulky frames, visible hardware
Performance Warranty	✔ 5–10 years with certified components	✘ No performance warranty
Wind Load Capacity	✔ Certified for high-rises and tough zones	✘ Suitable only for low-rise buildings
Hardware & Fittings	✔ Engineered systems with matching profiles	✘ Local hardware mix with no design unity
Aesthetic Value	✔ Frameless, flush-fitted, contemporary	✘ Traditional, less refined finishes
Price Factor	Slightly higher (15–20%) — justified by durability & performance	Lower initial cost, higher maintenance over time
Certifications	✔ Tested for acoustic, thermal & wind performance	✘ No standard certification
Ideal For	Premium homes, high-rises, weather-exposed zones	Cost-effective projects up to 7–8 floors

SYSTEM WINDOWS

System Windows are the signature of intelligent architecture — designed to disappear into your structure while elevating comfort, performance, and elegance. Custom-engineered for seamless integration, these windows offer exceptional thermal insulation, acoustic control, and sleek frameless visuals.

- Ultra-slim or frameless designs that blur boundaries.
- Precision sealing for all-weather protection.
- Thermal and acoustic comfort built into every detail.
- Integrates with sliding, folding, and tilt-glass systems.
- Ideal for high-rises, luxury homes, futuristic facades.

Windows are more than openings; they adapt, breathe, and dissolve the barrier between inside and outside. They move with the light and space, creating a seamless experience.

WINDOW FAÇADES

Where Function Meets Light

Glass is no longer a feature — it's the façade. Our advanced window façade systems fuse design purity with technical brilliance. Built for bold exteriors and breathable interiors, they elevate buildings with structural clarity, seamless integration, and enduring performance.

- Frameless or ultra-slim aluminium systems
- Uninterrupted panoramic views
- Weather-proof, wind-resistant, sound-insulated
- Ideal for luxury homes, hospitality, and high-rises

Let your space open up to the world — without compromise.

Railings & Global Alliances

Railings That Redefine Elegance

Premium Railings

- Spigot Systems | Core-Drilled or Surface Mounted
- Optional handrails in brushed or satin finish

Non-Premium Railings

- Aluminium & SS 304 options
- Designed for affordability without compromising safety

Juliet Balconies

- Glass-railed balconies with ultra-lux finishes
- Suitable for 12mm to 21.52mm toughened glass

Contact & Legacy

Crafting Spaces. Inspiring Lifestyles.

Whether it's a luxury residence, commercial space, or high-rise tower We deliver glass solutions that inspire, impress, and endure. Complete Solutions in Glass, Railings, and Windows.
